Microsoft Dynamics

LS Retail for Microsoft® Dynamics NAV
Retail POS Solutions for NFPs

LS Retail for Microsoft Dynamics NAV is a fully integrated solution, providing complete point-of-sale functionality that seamlessly connects your POS Terminals, Microsoft Dynamics NAV and Serenic Navigator. It provides powerful back office functionality both in-store and at the main office.

LS Retail for Microsoft Dynamics NAV gives the store manager total control of activities within the store and manages the replication of data between the POS terminal, back office and head office.

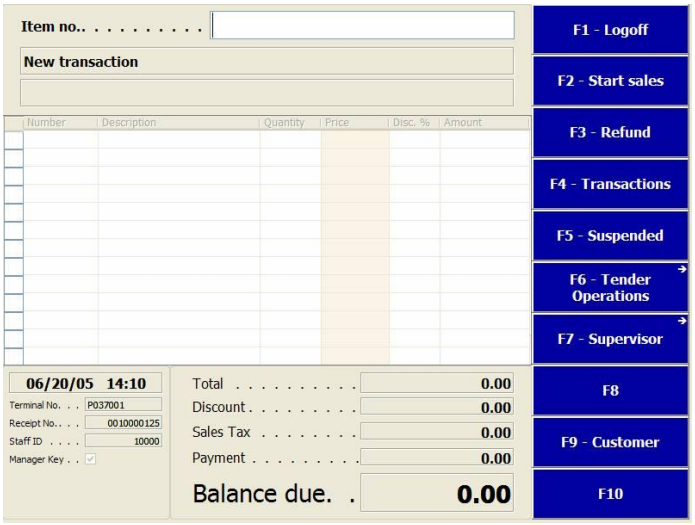
- Advanced reporting: Period, location, department; Sales, profit, cost, discounts; Salesperson, items, item groups



Written within Microsoft Dynamics NAV, LS Retail controls the fundamental aspects of your organization's retail business. It simplifies the management of items, customers and staff in the retail environment. LS Retail handles the management of Stores and POS as well. In fact, you can control almost all aspects of your POS terminals from within the back office. This simplifies both setup and management since the configuration is done in one place. The built-in data distribution management makes it easy to manage the flow of data to the stores. This makes selecting which prices and offers are valid in each store a simple task.
